

# Shippo carrier rate templates

iPacky has support for carrier rate templates in Shippo. Carrier templates typically use carrier provided boxes with fixed dimensions, and the rate based on weight.

Define boxes in Dashboard->Tools->Boxes that match the carrier template you want to use.

The dimension must exactly match the dimensions of the templates listed below, including the correct CM/IN dimension type.

The box name must also match the template Id. For clarity you can also use this format:

description | template id

For example: FedEx 10kg box | FedEx\_Box\_10kg
